EDUCATION

University of Victoria, Faculty of Engineering and Computer Science
Bachelor of Computer Science (Software Systems Option), Minor in Statistics

September 2023 - May 2028

PROFESSIONAL EXPERIENCE

Department of National Defense Canada – Real Property Operations

Victoria, BC

Digital Solutions CO-OP

May 2026 - August 2026

- Designed and developed a Power Apps Internal Correspondence Tracker, automating document routing and sign-off workflows across multiple departments, replacing a fully manual process.
- Built Power Automate workflows implementing automated notifications, status tracking, and escalation logic, enabling reliable, auditable data flow throughout the correspondence lifecycle.
- Architected a SharePoint-backed data layer for structured document storage and developed Power BI dashboards to surface correspondence status and operational metrics for management.
- Collaborated across departments and with a fellow co-op student to gather requirements, align on data and workflow needs, and deliver an end-to-end business process automation solution.

Consumer Protection BC

Victoria, BC

Programmer Analyst CO-OP

May 2025 - August 2025

- Developed 4 multi-page Power BI dashboards on transaction and survey data, improving data accessibility and reducing manual reporting time for managers.
 - Designed and optimized SQL queries on Microsoft SQL Server to filter and extract post-2020 transaction data, ensuring efficient, analytics-ready inputs for reporting pipelines.
 - Identified and documented 3 critical defects (7 total issues) during feature testing, providing potential fixes that improved application reliability.
-

PROJECTS

Automated Weather Data Platform

September 2025 - Present

- Designed and implemented a Python ETL pipeline ingesting weather data from the OpenWeatherMap API, transforming JSON payloads into partitioned Parquet staging files, and loading to PostgreSQL with idempotent inserts via uniqueness constraints.
 - Built a lakehouse architecture (Raw/Staging layers) with a storage abstraction layer supporting both local filesystem and Cloudflare R2 object storage via a boto3/S3-compatible backend, enabling cloud-portable data infrastructure.
 - Applied incremental processing with per-city high-water mark tracking, automated hourly scheduling via GitHub Actions, and a 100+ test pytest suite integrated into CI/CD.
-

SKILLS

Technology

- **Languages:** Python, SQL, R, Java, C, JavaScript
- **Data & Analytics:** Power BI, ETL Pipeline Design, Lakehouse Architecture, Medallion Pattern, Parquet, Incremental Processing, PostgreSQL, Microsoft SQL Server
- **Microsoft Platform:** Power Apps, Power Automate, SharePoint, Excel, Microsoft 365
- **Tools & DevOps:** Git, GitHub Actions, CI/CD Pipelines, pytest, VS Code, Azure
- **AI Tools:** Claude, GitHub Copilot, M365 Copilot, Perplexity
- **Soft Skills:** Cross-functional collaboration, technical documentation, stakeholder communication, attention to detail
